

The First Server The Right Server!

SBS2008 was designed specifically for small businesses that do not have a full time IT department. With SBS2008 you can Share emails, Calendars, Schedule meetings complete document control, control users disk space usage, and have total remote access 24/7. This with SharePoint 3.0, auto-mated server image based backups with backup of users Desktop Documents. Daily re-
porting with automated PC and Server Updates makes it a complete server solution.

NO Full Time IT Department Required!

Easy to use wizards makes administration a breeze, with basic knowledge you can create accounts in less than 1 minute. Daily emailed reports tell you exactly the status of your server and backup condition. Never again will you ask; "Do We Have A Backup?"

Fight SPAM With Easy To Manage Exchange e-Mail Server 2007:

Wizards to control accounts on Microsoft Exchange Server 2007 makes management an ease. With Pre Configured Real time Block lists and Intelligent Message Filtering, you can fight spam and make your working team more productive.

Just Like Big Businesses With Exchange 2007 You Can:

Consolidate and access multiple email accounts.

You can use Out of office Auto Replies.

You can use email Distribution lists.

You can use Shared email Folders between users and groups.

You can use Shared Address Lists between users and groups.

You can share Calendars and Schedule meetings and invite users to join.

With iPhone and WM5/6 Smart cell phones, you can directly access the exchange server

With WAP enabled phones, can access email with a text based viewing.

Using Outlook Anywhere technology with Outlook 2003/2007 means your mail, calendars and folders are synchronized in any PC you login to. (Not having to worry about lost email) Web access to your email from anywhere in the world with Outlook Web Access.

Small Business SharePoint 3.0 Services (<http://companyweb>)

This is a complete Document control Center, and Web Portal, that users can check out documents edit and retrieve documents. With "Full Text Search" you can find and use those documents fast. Plus Shared Company Calendar, Project Planning, view incoming Faxes, Start Discussion groups. Wiki And much more...

**With SBS2008 you will look BIG to your customers,
No Matter How Small You Are!**

Ever feel like you'd like to do more, with Less stress?

Remote Access (RWW - Remote Web Workplace)

Ever Get home and forget that you had a document at work that you needed to work on? Well no more driving back to work. With even a Dial up Connection and Remote Web Work Place you can access your PC or Document. (Totally Secure With Complete 128 bit SSL Encryption)

What is RWW? (Remote Web Workplace) It's a website portal that provides access to e-mail, the company's internal SharePoint Web site, and remote access to PC's at work. From any Microsoft browser any user can access his or her desktop with Complete Security (SSL) and privacy. (Screen Darkens at Office) This is especially useful in small companies when people are out sick, most people have some internet access at home, they can login and do that "important task" that can't wait until tomorrow. With RWW any Windows PC or Server on the Network can be accessed. This makes administration a breeze, and in the event you do need support. You can ask SBITS.Biz to remotely fix a computer, with no on site visit required.

Want More than Remote Web Work Place?, like a VPN Connection?

SBS2008 also includes Secure Virtual Private Network capabilities. Any "remote enabled" user can configure a client at home in seconds. (XP/Vista/Win7- can connect Via VPN.)

Backup and Restore Files. (Image based and Bare Metal Restore.)

SBS Wizard will configure schedule custom automatic backups, this backs up not only the server, but users "My Documents" on Vista and Windows 7, You will also backup your desktop documents and IE Favorites. You get Daily Email reports on the status of this. Users can recover files that they have accidentally deleted, by themselves. Even Email that has accidentally been deleted, can be recovered without an IT person.

Automatic Updates: (Windows Server Update Services AKA WSUS 3.0)

Ever Wonder if your computers are up to date with Security Patches? Small Business Server 2008 takes care of that so no more worries that computers are up to date with patches.

What More Features? SBS Premium, with SQL 2008

Power all your Business with the full features of SQL Server 2008

Note: All PC's on the network should be running XP-Pro Vista Business or Windows 7 Business (Home or basic versions of this software cannot login locally to a SBS2008 Domain)
